**PLEASE NOTE:** Behavior problems in animals can be due to physical illness or discomfort that can only be relieved by timely medical treatment. **Before beginning essence therapy, it's important to check with your veterinarian to be sure there is no physical cause for a change in behavior.**

Animals have rich and complex emotional lives just as humans do, and they are very responsive to the gentle influence of **featherhawk essences**. They are also highly sensitive to the emotions of the people around them, and willing to help us deal with our own emotional baggage.

Because of this, as often as our animal companions need the support of essences for their own issues, it can be important for humans to take essences to help our animals, too. When all the people and animals in a household are taking essences focused on a particular issue or behavior, everyone benefits.

All **featherhawk essences** offer support for your animal friends. These nine essences have been specially selected because they address a range of common animal issues including:

- Behavioral problems
- Training issues
- Recuperation from injury, illness, or surgery
- Life transitions (moving, adoption, family changes)
- Relief from stress and trauma
- Abuse and abandonment

## The Essences

**Abandonment** When you feel abandoned by another, look within yourself. Know you are the only one who can abandon you. Return to yourself, reclaim your power, and ask for what you want. This is an excellent remedy for rescued, abused, neglected and abandoned animals, helping them restore a sense of self and remembering they are loved.

EE1 1/2 oz \$8.99

**Chestnut Bud** The "Rake Theory" essence. Get your lessons the first time. You're walking across the lawn and step on the business end of a rake. The handle comes up and smacks you in the forehead. If you leave the rake where it is and continue to walk the same path, you'll keep getting smacked in the forehead. Stay present and watch where you're going. Then move the rake or take a different path---your choice.
