

Essential Harmonics™

EHO 16 clear 1/2 oz dropper bottles \$144.00

Everything is frequency: every bone, organ, and cell in your body. Every tree, flower and blade of grass. Every human and critter of every description. Every breath, every drop of water, every stone. Everything.

Frequency is the basis of all that we see and experience in our world. Light, sound, color, form --- all is manifested by different frequencies of vibration. When frequencies are out of balance or “out of tune” (dissonant or disharmonic), we feel out of sorts. When they are in balance or “in tune”, we feel great. Sometimes the effect is obvious, sometimes it’s subtle. Because humans have a fairly limited visual and auditory sensitivity, we miss a great deal in our environment and within our own being.

The **Essential Harmonics™** essences include the full spectrum of sound, light, and color that we can see and hear, and all wavelengths beyond our Earthly senses. When I was directed to co-create them, I was told they embody all frequencies known to Man and all frequencies known only to God.

Additionally, the twelve chromatic tones in the set represent the qualities of the 12 Disciples, adapted from Charles Fillmore’s book, *The Twelve Powers of Man*.

The **Essential Harmonics™** put all frequencies at your fingertips, giving you the opportunity to re-integrate them into your Body, Mind, Soul and Emotions without having to know what frequency is out of harmony. Simply check to see what you need using muscle testing or dowsing, your intuition, or any system that works for you.

Using the Essences

You can use the **Essential Harmonics™** essences to balance and align your chakras, to restore the proper frequency to a specific area of your body (determined by using the technique that works best for you), to do Earth healing work, to work with your animal companions, and more. Whatever your imagination can devise, the Essential Harmonics can be used for support.

You can also apply them topically or simply place the bottle on the chakras, acupuncture points throughout the body, on joints, vertebrae, or organs, or any area in need of attention. Ask each essence to deliver the frequency your body is most in need of, and it shall be done - you do not have to know the exact frequency yourself.

If you are working with the **Essential Harmonics™** set by itself, be sure to open your session by taking White Lotus, check yourself for the essences you need, then close your session by taking Wind. If you are working them with other **featherhawk essences** (or other company's products) there's no need to follow this protocol.

The Essences

White Lotus Your essential nature; the beginning point of each moment. Fully embrace and embody your own enlightenment, letting go of distorted ideas and false concepts gained in third-dimensional living. Whether you emulate an enlightened being or feel you have been touched by such a one and transformed, reaching in to your own true nature is the key. Envision your Self inside the image of the White Lotus; see your Self reflected in its purity and wholeness. This is the "opening essence." Take it at the beginning of each session with the Essential Harmonics. It can also be used during your session, as you are guided. (Note: if you are using the Essential Harmonics with other **featherhawk essences** you have, you do not need to use White Lotus as the opening essence.)
