

# *featherhawk* Energetic & Environmental Essences

These high vibrational essences help you explore your inner and outer environment. Drawn from energies and aspects of nature that are less concrete than plants, animals and minerals, they are every bit as much a part of our daily lives.

They call in energies from the surrounding outer environment (i.e. Niagara Falls, Full Moon, and Cloudbows), and the inner environment (i.e. Abandonment, Battle, and Vision).

They are co-created by attuning to places and situations, concepts, feelings, and the inner muse, inviting these aspects of Nature to share their power with you.

The Energetic and Environmental essences help you gain perspective and embrace today's rapid pace of change and transformation with clarity and joy.
